antonine PRINTING INKS LTD

SPIRITFLEX

- Excellent printing at all speeds
- Very high colour strength
- Moderate light fastness
- Suitable for wax sealing (i.e. bread wrappers)
- Ideal for bar coding
- Good solvent release

Inks are alcohol soluble dye inks formulated for printing on paper to give high strength prints. They are mainly used for printing paper bags, bread wrappers, envelopes etc. They can, in special cases, be formulated to exhibit good light fastness by using light fast dyes.

Reduction to press viscosity is achieved by adding one of the following thinners, depending on print conditions.

SPEED
NORMAL
SLOW

REDUCER
ETHANOL
METHOXY PROPANOL

Product resistance: due to moderate light fastness, SPIRITFLEX inks should only be used where a commercial light fastness is required.

The complete Colour Range of SPIRITFLEX inks can be supplied, be it a standard colour, Pantone matching or a specialist matching.
